

Air Filter Oil Spray

Adhesive oil in spray for foam air filters

Cross, Enduro, Trial, Trail motorcycle, Road, ATV ...

TYPE OF USE

MOTUL Air Filter Oil Spray is a specific lubricant designed for foam air filters on Off-Road bikes, Road bikes and ATV.

Use MOTUL Air Filter Clean for a perfect cleaning of your air filter prior to each lubrication.

PERFORMANCE

Efficiently retains dust, mud and sand for an extended engine life span.

Limited load loss on air intake : improves engine power output.

Anti-clogging formula.

Prevents water penetrating the filter when crossing fords.

Rapid drying to avoid drips.

Blue coloured for easy application.

RECOMMENDATIONS

In order to obtain the best result, first clean the foam filter with MOTUL Air Filter Clean.

Then spray MOTUL Air Filter Oil Spray at about 20 cm for a better diffusion on the air filter then let dry for at least 10 minutes before refitting it.

To improve air filtration efficiency, it is better to grease the rim of the filter and the inside of the air box with MOTUL Tech Grease 300.

SECURITY

Refer to the information mentioned on the label and also to the MSDS sheet.
